

Great Value LED light bulbs are a great option for their cost and energy efficiency. Built for durability, the solid structure of the LED bulbs will outlast any incandescent bulb while using up to 80% less energy. Need help deciding between a Daylight or Soft White LED? Consider the atmosphere you are hoping to create with your new energy efficient LED bulb. The Daylight LED light bulb creates a crisp natural effect and will be the right choice for Display areas, security lighting, garages, and task lighting. The Soft White LED light bulb will provide a much more calming effect. This bulb is generally chosen to deliver a cozy and inviting ambiance. This is the recommended choice for your living room, kitchen and bedroom lighting.
